

## NIFTY SPOT : IMMEDIATE SUPPORT AT 24700-24580

Source – TradingView, BP Equities Research

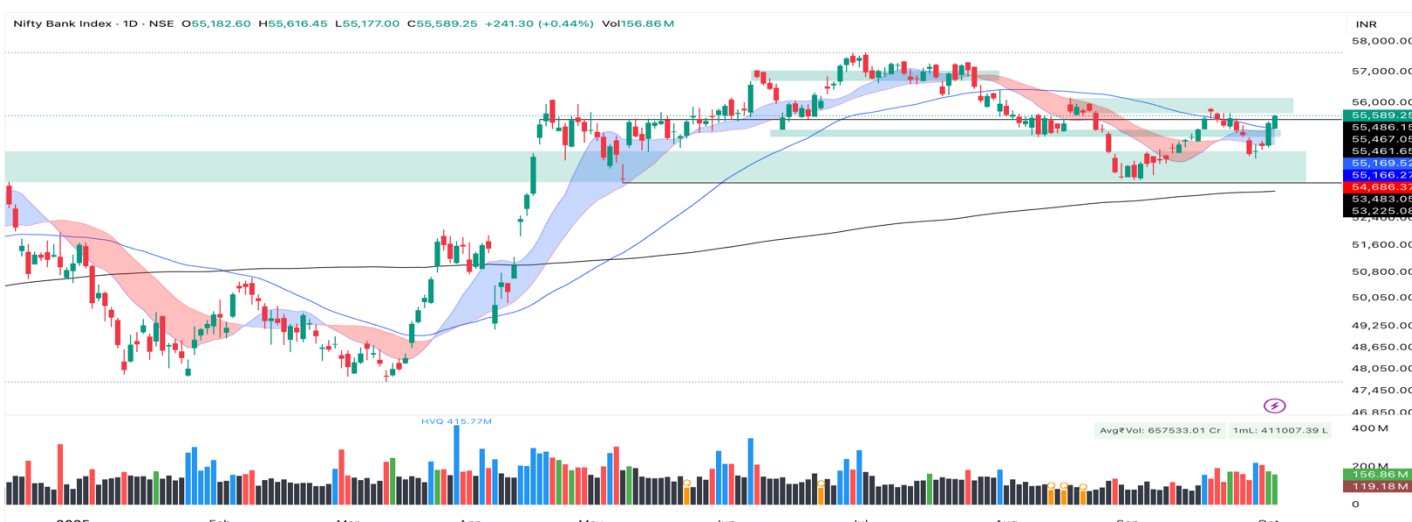

The benchmark index continues to trade in a broad consolidation range, showing indecisiveness near its key short-term average. The immediate and crucial hurdle for the bulls is the supply zone of 25,000-25,100. As long as the index trades below this level, the sentiment remains sideways to slightly negative, with a possibility of retesting the strong support base at 24,650-24,700. A decisive breakout above 25,100 is essential to trigger fresh upward momentum. Options data suggests significant call writing at the 25,000 and 25,100 strikes, reinforcing this resistance, while the 24,700 put strike holds substantial interest, acting as a floor for now.

Intraday Nifty

Resistance – 24850-25000-25100

Support – 24700-24580-24420

## BANKNIFTY SPOT : IMMEDIATE SUPPORT 55000-54500

Source – TradingView, BP Equities Research

The banking index is currently poised at a critical juncture, hovering right above its 50-day moving average, which is a key trend-deciding level. The index faces stiff resistance in the 55,900-56,200 zone. For the uptrend to resume, it needs to decisively move and sustain above this barrier. On the downside, the immediate support is located near 55,000. A break below this psychological level could increase selling pressure, potentially dragging the index towards its next support at 54,500. The highest concentration of call open interest is at the 56,000 strike, acting as a significant ceiling, while the 55,000 put strike provides immediate downside protection.

Intraday Banknifty

Resistance –55900-56500-57100

Support –55000-54500-54000
