

NIFTY SPOT : IMMEDIATE SUPPORT AT 25740-25650

Source – TradingView, BP Equities Research

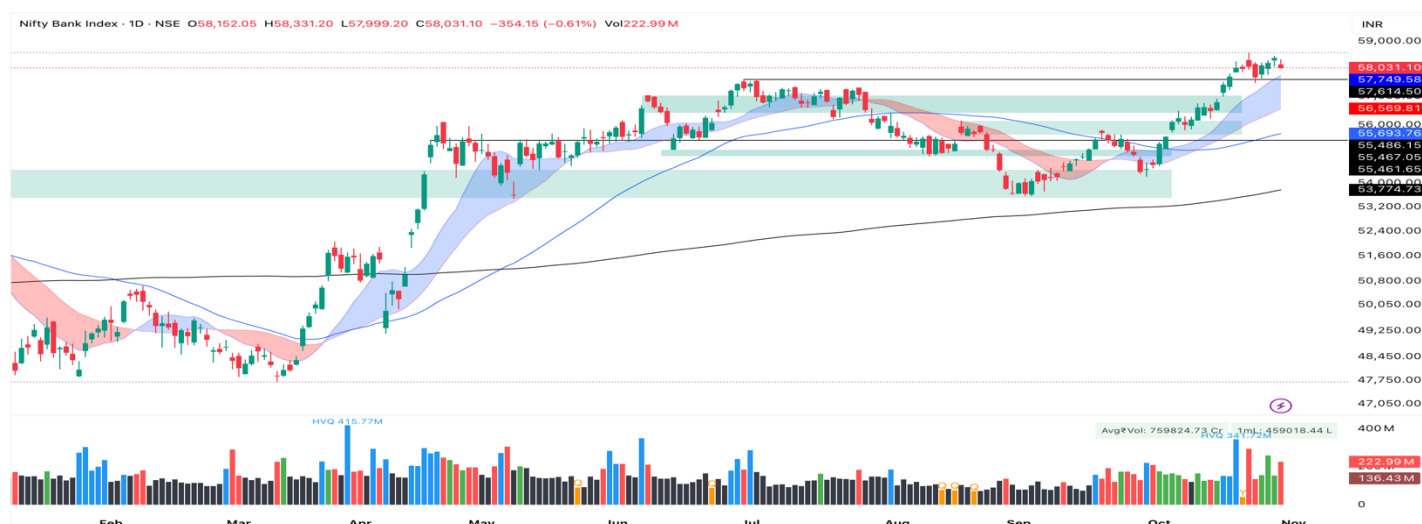

The benchmark index witnessed a sharp bout of profit booking after hitting a new swing high, forming a large bearish candle that has broken the previous day's low. This indicates a strong rejection from the 26,050 level, which now acts as a formidable short-term resistance. The index has slipped below the psychological 26,000 mark, and the immediate support to watch is now the gap zone at 25,740. A decisive break below this support could intensify selling pressure and signal a deeper correction. The momentum has turned cautious, and the bulls will need to defend the 25,740 level to maintain their advantage. Options data suggests call writers have aggressively taken control of the 26,000 strike, turning it into a significant hurdle.

Intraday Nifty

Resistance – 26000-26130-26280

Support – 25740-25650-25540

BANKNIFTY SPOT : IMMEDIATE SUPPORT 57800-57300

Source – TradingView, BP Equities Research

The banking index faced intense selling pressure near its lifetime highs, resulting in a powerful bearish candle that erased the prior day's entire move. This pattern signals a strong rejection from the 58,400 zone, which has now been established as a major resistance. The index did, however, manage to find support near its low and closed just above the critical psychological level of 58,000. This 58,000 mark is now the immediate make-or-break support; a failure to hold it could confirm a short-term top and lead to a pullback towards the next support at 57,800. The options data will now show a major battle at the 58,000 strike, which bulls must defend to prevent a deeper correction.
