

NIFTY SPOT : IMMEDIATE SUPPORT AT 25650-25500

Source – TradingView, BP Equities Research

The benchmark index opened with a massive gap-up at 26,341 but succumbed to intense profit booking right from the opening tick, closing off the highs at 25,728. Despite registering a net gain of +2.55%, the index formed a large candle, indicating that the higher valuations were used by traders to lighten their positions. Crucially, the index tested a low of 25,641, filling a significant portion of the intraday gap, but managed to respect the 25,600 support zone. The gap area typically acts as a strong demand zone. Therefore, the strategy remains buy on dips as long as the index holds above 25,500. A pullback towards 25,600–25,650 should be seen as a buying opportunity, targeting a retest of 26,000. On the upside, 25,840 now acts as a formidable supply barrier.

Intraday Nifty

Resistance – 25840-26000-26180

Support – 25650-25500-25340

BANKNIFTY SPOT : IMMEDIATE SUPPORT 59800-59400

Source – TradingView, BP Equities Research

The banking index mirrored the benchmark's volatility, opening significantly higher at 61,411 but facing sharp rejection from the highs to close at 60,041. It formed a large candle, shedding over 1,300 points from its intraday peak of 61,764. However, the structural breakout remains valid as the index successfully defended the psychological 60,000 mark and the intraday low of 59,793. This reaction suggests a mean reversion after an exuberant opening. The view remains buy on dips near the 59,800–60,000 support zone, which was previously a resistance and has now flipped into support. A sustained hold above this level could trigger a fresh rally towards 61,000. Options data suggests that 60,000 is the new pivot; as long as puts at this strike are defended, the bias remains positive.

Intraday Banknifty

Resistance –60300-60800-61200

Support –59800-59400-59000
