

NIFTY SPOT : IMMEDIATE SUPPORT AT 23720-23570

Source – TradingView, BP Equities Research

The benchmark index closed at 23,873, down 41 points, closing exactly at the session low, opening at 23,998 and testing a high of 24,025 that briefly cleared the 24,000 psychological level and the 24,000 support, before sellers took full control for the rest of the session, a bearish structure with no lower shadow that shows conviction into the close even on a modest headline decline. This confirms 24,000 has flipped from support to resistance, rejected on its first retest from below. RSI extended its slide, deep in bearish territory and the lowest reading since early July, while MACD line has flipped back above signal, reversing Wednesday's bearish crossover within a single session, a whipsaw that reflects genuine indecision at these levels rather than a clean trend. Volume eased from Wednesday's, meaning the rejection at 24,000 came without a distinct pickup in participation. The close remains well below both the 50 DMA and the 200 DMA, with 23,700 now the immediate support and a close back above 24,000 the level needed to repair the past two sessions of damage.

Resistance – 24000-24140-24270

Support – 23720-23570-23410

BANKNIFTY SPOT : IMMEDIATE SUPPORT 57000-56500

Source – TradingView, BP Equities Research

The banking index closed at 57,381, up 209 points on paper, though the session itself was far more bearish, opening at 57,498, rallying to a fresh high of 57,754 that tested deeper into the 57,500 to 58,000 resistance band than any session this week, then reversing the entire advance to close exactly at the low, a shooting star structure with a long upper shadow that shows the push toward 58,000 was firmly rejected even though the close still landed above Wednesday's level. The close remains below the 50 DMA but stays above the 200 DMA, keeping that average the deeper support anchoring this now three week range. MACD line climbed back to essentially zero, with signal at negative 39 and the histogram widening, a real recovery in momentum despite the failed breakout attempt. RSI held, just below the midline. Volume picked up from Wednesday's, lending genuine weight to the rejection at the highs rather than reading as a thin failed test. The 57,500 level is now the level to watch on any renewed strength, while 57,000 becomes the immediate support to hold.

Intraday Banknifty

Resistance – 57500-58000-58500

Support – 57000-56500-56000
