

## NIFTY SPOT : IMMEDIATE SUPPORT AT 23600-23420

Source – TradingView, BP Equities Research

The benchmark index closed the previous session at 23,779, down 119 points. The session opened at 23,883, just below the day's high of 23,890, then declined through the session to a low of 23,738 before closing 41 points above that low. Price remains below both the 50-day and 200-day moving averages and below the cloud, extending the pullback from the 24,180–24,210 zone that has capped upside on repeated attempts since June. That zone forms the upper boundary of the ascending triangle built off the April low near 22,190. The MACD line remains below both the signal line and the zero line, with the histogram negative, while the RSI has eased to 35, below the lower reference band. Volume came in at 206 million shares against a recent average of 314 million, a divergence worth flagging given the decline was not accompanied by a rise in participation.

## BANKNIFTY SPOT : IMMEDIATE SUPPORT 56500-56000

Source – TradingView, BP Equities Research

The banking index closed the previous session at 57,088, down 281 points. The session opened at 57,343, pushed to a high of 57,427 inside the 57,250–57,590 resistance band, then reversed to a low of 57,003 before closing 85 points above that low, leaving an upper rejection wick from the band. Price remains below both the 50-day and 200-day moving averages, which have converged near 55,500, and remains below the cloud. The recovery from the April low near 49,955 has tested the 57,250–57,590 zone on repeated occasions without a sustained break above it, and the latest reversal keeps that zone intact as resistance. The MACD line has moved below both the signal line and the zero line, with the histogram now negative. The RSI has eased to 45, inside the neutral band, down from levels above 60 reached in recent weeks. Volume came in at 130 million shares against a recent average of 191 million, a divergence worth flagging given the reversal was not accompanied by a rise in participation.
